PROFESSIONAL EXPERIENCE

Junior Software Engineer

Jan 2026 - Present

T.E.J. Center Private Limited | Kupondole, Lalitpur

- Developed Okhati an offline-first medication reminder mobile application for elderly people
- Enabled caregivers to manage multiple patients with cloud sync (Supabase).
- Integrated OCR to auto-fill medicine names from images.
- Built medication scheduling, notification, and dose tracking system (taken/missed) with adherence analysis and visualization
- Optimized image handling for efficient storage.
- Followed standard coding practices with clean architecture, and used version control workflows (PR stacking, rebasing, and structured Git collaboration) for efficient team development

Software Engineer Fellow

Jul 2025 - Dec 2025

T.E.J. Center Private Limited | Kupondole, Lalitpur

- Built a full-stack web application using React and Node.js, developing UI components, backend APIs, and database integration.
- Collaborated in a team-based monorepo environment, contributing to shared codebases, feature development, and debugging workflows.

SKILLS

Technical Skills: JavaScript, TypeScript, React, Node.js, PostgreSQL, MongoDB, Python, HTML, CSS, REST APIs, React Native, SQLite, Supabase

Tools: Git & GitHub, Docker, Redis, Kafka, Postman, Figma

Soft Skills: Problem-solving, Collaboration, Decision-making, Communication

Languages: Nepali (native), English (proficient)

PROJECTS

Mailchimp RAG Chatbot

- Built a RAG-based chatbot using Node.js and LangChain to automate Mailchimp support with accurate, context-aware responses
- Implemented hybrid search (BM25 + semantic search) and conversational memory for improved multi-turn query handling
- Developed a React interface to display and interact with chatbot queries and responses

Echo – Anonymous Audio Confession Web App

- Built an anonymous audio platform where users can share voice confessions without revealing their identity
- Added real-time features like live reactions, themed rooms, and instant updates using WebSockets (Socket.io)
- Used JWT for authentication and managed app state with Redux, with MongoDB as the database for scalable data storage

EDUCATION

University of Helsinki | Finland

Jun 2025 - Dec 2025

Full Stack Open - Remote

- Completed a full-stack web development course covering React, Node.js, Express, PostgreSQL, and modern web development practices.
- Built scalable web applications through hands-on projects.

Institute of Engineering (IOE), TU | Dharan - 8, Sunsari, Nepal

May 2021- May 2025

Bachelor of Electronics, Communication and Information Engineering

Relevant Coursework: C programming, OOP concept, Microprocessor, Embedded System, Object Oriented Software Engineering, Discrete Structure, Data Structure and Algorithm, Digital Logic, Data Mining, Artificial Intelligence, Information System, Control System
